

Enjoy the benefits of MDR in Wet Environments.

Pulse® Roller's Wash Down roller gives you all the benefits of your typical motor roller such as low cost energy, safe conveyance, and low maintenance cost even in wet environments. All wash down roller components are made with stainless steel. Corrosion resistance makes it possible to install Pulse® Roller in food processing, beverage handling, pharmaceutical handling, and sanitation applications. No need to change your control scheme just because you need a wash down rated conveyor. And, coupled with EZ-24 or ConveyLinx® products, you can configure your system with a touch of a button.

Features:

- Stainless Steel Wash Down Rated
- Available in 35 or 50 Watt Rollers
- IP55 and IP65 Rated
- Spring Loaded Non Threaded Hex Shaft
- Ambient Temperature 32F to 105F
- Threaded Hex Shaft Powered End & Non Threaded Hex Shaft Non-Powered End
- Spring-Load Shaft for IP55 & Non-Spring Loaded Shaft for IP65

Pulse® Roller's Wash Down Rated roller is readily available for 35Watt (yellow) and 50Watt (black) motor rollers. Depending on the Motor and speed code selected, roller speed's range from a remarkable 16.1 to 202 feet per minute. Also, to keep things simple we have made the Roller's dimension the same as our standard roller offerings. Condensation and corrosive gases are non-existent within these rollers and Vibrations is less than .5G.

Pulse® Roller helps improve productivity and flexibility for material handling systems while enabling you to select the components that will provide maximum system benefits. Pulse® Roller is known for providing the lowest cost in the industry and still maintaining more speed and torque with less energy. If you would like to learn more about the 24VDC Wash Down Rated Roller or any of our other products please contact Insight Automation.
